

Ozone & Filtration Innovation

The Ozotech Enhanced Oxidation Generator

The Ozotech Enhanced Oxidation Generator (EOG), when combined with the Clack Corporation automatic water filter control valve will provide active ozone during the back-wash process and leaves a head of ozone in the filter. This patented process aides in the oxidization, cleaning, and the filtering of iron, manganese, sulphate and various other heavy metals from your water. Utilizing the OzotechEOG can also aid in anti-microbial protection against nuisance bacteria and reduce unwanted odors.

The OzotechEOG is the "Next New Technology" in water treatment and has a place in any water company's water treatment toolbox. There is no better system on the market.

EASY TO INSTALL AND BUILT TO LAST

With just a few steps, the compact OzotechEOG mounts directly onto the Clack® control valve. The system includes the patented stainless steel Ozotech CD cell and features an all-weather enclosure.

IMPROVES QUALITY OF WATER

Ozone is proven to destroy microorganisms and remove minerals such as iron and magnesium instantly and effectively without harmful residue. The system will also assist in eliminating unwanted odors such as rotten egg, stale, or musty smells.

LOW MAINTENANCE

With no chemicals or pumps to maintain, the OzotechEOG requires very little maintenance. The system is also energy efficient drawing only milliamps per day. A cleaning kit and instructional video are available upon request.

NO HARMFUL CHEMICALS

Ozone has been proven to kill bacteria faster than chlorine, eliminating the need for traditional chemicals such as hydrogen peroxide or chlorine typically used to disinfect water. The OzotechEOG is safe for the environment including septic systems.

STATE-OF-THE-ART TECHNOLOGY

With more than 30 years developing and manufacturing ozone technology, Ozotech products are safe, reliable and proven. The OzotechEOG has been tested by Clack® to be compatible with their ozone resistant control valve.

The OzotechEOG mounts directly onto the approved Clack® ozone resistant control valve. Contact Ozotech for approved Clack distributors.

Partnering with Ozotech

In the last 30 years, Ozotech, headquartered in Yreka, California at the base of Mount Shasta, has established itself as a global distributor and leading manufacturer of ozone generation equipment. Our success is based on a number of factors: constant improvement of technology and manufacturing processes, high customer satisfaction, our commitment to sustainable technology, and our dedication to excellent customer service and quality.

Ozotech systems satisfy the demands from a variety of global markets such as alternative health treatment, food service, hospitality, schools and universities, beverage plants, aquariums and zoos, retail, and many more. Just about anywhere there is a need for clean water, sanitation, or pure air, there is a use for ozone. Ozotech is here to meet that need.

Comprehensive Design and Engineering Resources

By partnering with Ozotech, our talented team will work with your company to design, engineer, and market an ozone solution to fit your company's specific needs. Here's what just two of our partners have to say about working with Ozotech:

I have been working with Ozotech for the past six years and innovation is a huge part of our business model. Ozotech has provided the innovation and the response needed to keep our product line strong. Anytime changes are needed we can sit down and discuss and implement a plan of action. If I was unable to do this our product line would not have the innovation needed to make leaps and bounds. A great relationship with a great manufacturer is what is needed to grow a business.

Tobias Segal
Promolife

Ozotech has dramatically improved our ability to deliver the correct product to our highly valued clients, making us one of the leading companies in ozone supply to the aquatic industry in Australasia. The Ozotech team has ensured we supply the highest quality ozone products to our marketplace, backed by unrivaled service and advice. The team is always very helpful and courteous answering any questions in a professional and timely manner. Ozotech products are second to none worldwide, using only high quality parts in their products. I could not recommend any other company to support our ozone needs
